ABSTRACT

The report, fact sheets, and news releases cite findings of a survey involving 22,000 Ss to determine the attitudes of high school student leaders. Responses were tabulated for the following areas: demographics, government mandates/taxes, American institutions, domestic issues, foreign issues/defense, religious beliefs/practices, marriage/sex, male/female roles, and education (school problems, budgets, drugs/violence/student problems, discipline, grades, personal skills/values, teacher evaluation, bussing, private/parochial school funding, bilingual education/languages, sex education, basic skills instruction, study/work habits, quality of education rating, and college. The survey booklet breaks down statistical data by sex, race, community, and region. Among the findings summarized in the fact sheets and news releases are that students cite lack of funds, equipment, and supplies as the biggest problem; that 72% feel parents should get more involved in guiding children's behavior to quell violence on campus; and that more than half think foreign languages instruction should be required in high school. Introduction

This survey was conducted by "Who's Who Among American High School Students," Northbrook, Illinois, during the summer of 1981 for the purpose of determining the attitudes of student leaders in our nation's high schools. It is the largest independent sampling of this segment of the student population taken annually and this year marks its 12th anniversary.

"Who's Who" believes that, in these rapidly changing times, it is important for the nation to be aware of student opinions and attitudes. Today's teens are not only an important segment of the present voting population, but will be assuming positions of leadership as this country enters the 21st century. Hopefully, as the data from this 12th national survey is circulated and studied, significant trends will be uncovered.

We regard this survey as an educational experiment. We are in no way attempting to promote or negate any political, moral or social philosophy, organization, firm or individual. Because of our contact with student leaders, we believe we are in a position to gather important facts and meaningful information and, therefore, have a corporate responsibility to conduct this survey.

This year's questionnaire is a composite of questions asked over the past 11 years. Prior to this survey, the questionnaire was developed with the help of a 25 student Advisory Board and educators across the country.

Although we of "Who's Who" feel that some of the questions and answers are of a private and controversial nature, we do not hesitate to take the responsibility for the project in order to achieve our objective of identifying and measuring student attitudes. We apologize to anyone offended by any of the material presented herein.

Though by no means a reflection of today's "average" student because it is dealing with the opinions of student leaders and high achievers, we feel this survey does give insights into the thoughts of those leaders who set standards and behavior patterns for others to follow.

Of the 350,000 high achievers featured in the 1981 edition of "Who's Who Among American High School Students," 50,000 students whose biographies were received by July 1, 1981 were sent the survey. Some 22,000 completed questionnaires were returned.

These 22,000 responses form the base of the survey. All students surveyed were members of the junior or senior class during the 1980-81 academic year. They were selected for recognition in "Who's Who" by their principals or guidance counselors, national youth organizations or the publishing company because of their high achievement in academics, activities, community service, athletics or their performance in national scholarship or award contests.

The 350,000 students listed in the 15th annual edition of "Who's Who" represent approximately 5 percent of the 6,500,000 students who are high school juniors and seniors during the 1980-81 academic year. They represent 20,000 of the 22,000 public, private and parochial high schools in the nation.

This survey was tabulated by computer. Questions were tabulated by total response; breakdowns by sex, race, geographical region and type of community are also included. On questions calling for write-in answers, results are shown of the most frequently mentioned answers.

Participant Data/Demographics

Total Sample: 22,000

Sex

Male	35%
Female	65%

Race

Caucasian	87%
Black	7%
Other	6%

Type of Community

Urban	15%
Suburban	28%
Rural/Small Town	53%
N/A	4%

Geographic Region

Northeastern States (PA, NY, VT, NH, ME, MA, CT, RI, NJ)	12%
Midwestern States (ND, SD, KS, NE, MN, IA, MO, WI, IL, MI, IN, OH)	25%
Southwestern States (AZ, NM, TX, OK)	16%
Southern States (AR, LA, TN, KY, MS, AL, WV, FL, GA, SC, NC, VA, MD, DE, DC)	37%
Western States (WA, OR, CA, ID, NV, UT, MT, WY, CO, AK, HI)	7%

Only Total Information Compiled On Following:

Age of Students Surveyed:

16	21%
17	77%
18	1%
N/A	1%

Grade Point Average of Students Sampled

A	67%
B	31%
C	6%

Future Plans of Students:

Going to college	95%
------------------	-----

Will need scholarship aid other than financial assistance from family to continue education:

Yes	75%
No	18%
N/A	7%

Plan to work during college:

Yes	69%
No	19%
N/A	12%

Family Income of Students Surveyed:

Under \$8,000 per year	6%
\$8,000-\$9,999 per year	5%
\$10,000-\$14,999 per year	13%
\$15,000-\$25,000 per year	30%
\$25,000 or more	37%
N/A	9%

SUMMARY OF RESULTS

TWELFTH ANNUAL SURVEY OF HIGH ACHIEVERS

"WHO'S WHO AMONG AMERICAN HIGH SCHOOL STUDENTS"

The nation's leading high school juniors and seniors are quite critical about education, have a better opinion about government than in past years, and generally stick to tradition in their private lives. Here is a summary of results from the annual survey of those recognized in "Who's Who Among American High School Students."

EDUCATION

Top teens report teacher incompetency, alcohol and pregnancy, students graduated without basic skills and student vandalism in their schools.

SUBJECT

Teachers/Administrators

STUDENT OPINION

Fifty-one percent of the "Who's Who" teens cite teacher and administrator incompetency as a primary problem in their school. Another 34% see teacher apathy as a problem, yet a majority (57%) don't believe students should have a voice in teacher evaluation and hiring.

More than half the top teens have worked with up to three unqualified teachers during high school and 37% have had from four to ten poor teachers. At the same time, 51% note they have worked with up to ten exceptional teachers in their school.

About a third of the students think teachers should be regularly tested to determine competency.

Better than half say teachers in their school are too easy academically and another 31% indicate they grade too high for the quality of work done.

Curriculum

A vast majority (88%) of the achievers say their own education is good and six out of ten report they have access to academic programs to meet their needs. In contrast, less than half (42%) feel their school has prepared them well for college.

Three-quarters think sex education should be taught in the schools.

A little more than half (51%) think American students should be required to take a foreign language in high school and nearly two thirds of the "Who's Who" students have studied a foreign language.

The teens also favor bilingual education in American schools (59%).

While 53% rate the quality of basic skills (reading, writing, math) as above average in their school, nearly the same number see students graduate without these skills.

Campus Social Problems

When asked whether they were aware of various activities taking place on their campuses, the "Who's Who" teens responded in the affirmative to:

Drug dealing/selling	58%
Student vandalism	77%
Pregnancy	83%
Drug Abuse	74%
Alcohol Abuse	84%
Truancy	65%
Student Apathy	88%

-more-

Violence in Schools-
Problems & Solutions

Nearly three-quarters of the teens believe drugs are a major factor affecting violence in the schools. Some 69% say peer pressure contributes and 64% blame parental apathy.

Few of the students (23%) feel that violence on television affects violence in the schools. And, less than a third think easy availability of weapons is a cause of school violence.

The solution to school violence for a vast majority of the respondents is parents. Ninety-two percent say parents should take a more active role in guiding children's behavior.

Following this, 84% of the teens say school discipline should be enforced for all students and three-quarters feel school administrators should adopt a "get-tough" policy and expel troublemakers.

"Who's Who" teens are, for the most part, model students. Forty-three percent have never been disruptive in class. Some (28%) note they have disrupted classes out of boredom.

School Funding

The most often mentioned problem confronting today's schools is lack of funds. Almost three-quarters of the students cited this category.

Asked to decide how they would adjust for school budget cuts, more than half would charge for summer school and 51% would decrease the number of administrators.

If curricula and/or activities had to be cut, sports would go before electives (22% to 21%). Two-thirds would do away with art classes and 38% with music programs.

Seventy-six percent of the group say public funds should not be spent on private schools.

College and Beyond

Nearly all (95%) of the top teens will go to college and three-quarters of those say they will need scholarship help.

The greatest number (20%) of high achievers will major in business administration, followed by medicine (17%) and engineering (16%).

More than six out of ten intend to do graduate work and about the same number want a college degree to get a good job.

GOVERNMENT & ISSUES

"Who's Who" teens have more faith in the presidency than in the past, think the defense budget should be increased, favor registration of handguns and mandatory draft registration.

The Presidency

Forty-five percent of the "Who's Who" teens have a great deal of faith in the presidency. Just a year ago, only 19% expressed the same kind of faith in the nation's top office.

The Economy

The economy heads the students' (67%) priority list for government this year.

Mr. Reagan's spending cuts meet with the approval of three-quarters of the teens.

If they could choose where their tax dollars were spent, the money would be allocated this way:

Education	82%
Defense	68%
Energy Resource	
Development	67%
Energy Conservation	62%
Environmental	
Protection	61%

Summary of Results - Page Five

Seventy-nine percent of the teens would vote for a proposition to limit property taxes in their state. But, they would only cut back three out of ten city/state services: Parks and recreation (51%), welfare services (56%), public transportation (45%). Everything else, from police to highway construction, should be maintained say the teens.

National Issues

Eight out of ten students advocate mandatory registration of handguns. Yet 75% think criminals will still get guns and use them.

Fewer than 18% of the teens oppose mandatory draft registration (56% are in favor) against 46% who were anti-draft just a year ago.

Some 68% favor the use of nuclear power as an energy source.

These students have more confidence in major corporations (57%) than in organized labor (52%); in broadcast media (71%) than print media (58%); in the FBI (79%) than the legal profession (78%).

Global Issues

In the case of Third World conflicts where communist nations are involved, 48% would send "military advisors." This is a 30% jump over a year ago.

These teens would favor U.S. military intervention if a communist country were the aggressor in South/Central America (68%), Europe (70%) and they're close to favoring it in the Middle East (48%).

-more-

PRIVATE LIVES

The nation's teen leaders take a drink now and then, but that's about it. Most have never used drugs, nor participated in sexual intercourse. They believe in traditional marriage and family life.

Drugs & Alcohol

For the first time in a number of years, a majority of the teens (53%) say they occasionally drink. In 1975, an average of 31% indicated they imbibed alcohol.

Nine out of ten high achievers have never used drugs and 91% say they wouldn't use marijuana even if it were legalized.

Some 87% have never smoked cigarettes.

Sex & Marriage

A fair number (73%) of the respondents indicate they have never participated in sexual intercourse. And, 44% believe premarital sex is not acceptable under any circumstances.

The majority (55%) do not favor abortion and almost two-thirds of the young women would not have one if they found themselves pregnant.

Most of the outstanding students (90%) believe in a traditional marriage. A third think living together outside of marriage is morally wrong and 44% deem it okay for others but not themselves.

Half the teens plan to have two children and almost 25% want three.

Although a good majority of the teens are career-oriented, two-thirds believe working in the home and raising children full time can be totally fulfilling.

Activities & Habits

Three-quarters of "Who's Who" teens are active members of a religion and more than 50% attend services each week.

Summary of Results - Page Seven

Activities & Habits
(continued)

Thirty-one percent watch from 16 to 28 hours of television a week.

Homework and socializing run neck and neck in terms of time spent by the teens. Forty-one percent spend six to ten hours a week on homework, while 42% spend the same amount of time socializing.

TWELVE YEAR REVIEW

ANNUAL SURVEY OF HIGH ACHIEVERS

"WHO'S WHO AMONG AMERICAN HIGH SCHOOL STUDENTS"

Following is a chart which compares student response from the second, sixth, tenth and twelfth Annual Survey of High Achievers of "Who's Who Among American High School Students." Where a year has no percentage, the question was not asked.

Subject/Question	1981-82	1979-80	1975-76	1970-71
School has prepared teens for college.	42%		72%	
Students do not believe in use of public funds for private schools.	76%		58%	60%
Students should have a voice in hiring teachers.	42%		54%	60%
Teens favor bussing.	16%		18%	27%
Teens favor sex education classes.	75%			8%
Teens want to graduate from college to get a good job.	60%		56%	
Teens have faith in presidency.	45%	46	31%	

Twelve Year Review - Page Two

Subject/Question	1981-82	1979-80	1975-76	1970-71
Teens favor registration of hand guns.	80%	75%		
Teens favor use of nuclear power for energy.	68%	63%		
Teens favor maintaining or increasing defense budget.	90%		44%	
Teens advocate military involvement if a communist nation were involved:				
Middle East	48%		42%	30%
Europe	70%		56%	
South/Central America	68%		58%	
Teens have <u>not</u> participated in sexual intercourse.	73%	78%	69%	77%
Teens prefer traditional marriage.	90%	85%	81%	81%
Teens favor living together prior to marriage.	21%	8%	34%	47%
Teens approve premarital sex.	51%	38%	63%	50%
Teens favor legalized abortion.	42%	46%		70%
Teens using marijuana.	10%	8%	25%	21%
Teens approve legalizing marijuana.	16%	26%	35%	30%
Teens occasionally drink.	53%	40%*	31%*	68%*
Teens members of organized religion.	75%	86%	74%	72%

* In these surveys, the teens were asked three separate questions with regard to use of beer, wine, hard liquor. This figure is an average of those responses.

TEEN LEADERS CRITICAL OF EDUCATION
BUT HAVE MORE TRUST IN GOVERNMENT

America's leading high school students cite teacher incompetency as a big problem in their schools, have more faith in the presidency than in many years and more admit to drinking than in the past.

These are among the findings in the Annual Survey of High Achievers recognized in "Who's Who Among American High School Students." For the past twelve years, the publication has chronicled attitudes and opinions of the nation's outstanding teens.

This year's poll focused on education in America. To insure accuracy on the issues and in the questions, "Who's Who" publishers sought the assistance of Casey Banas, education editor of the Chicago "Tribune," and counsel from its Committee on Ethics, Standards and Practices. *

Next to lack of funds, equipment and supplies, more than half of the top teens named teacher and administrator incompetency as the major problem in their schools.

* For member names: Committee on Ethics, Standards and Practices. see Fact Sheet, "Who's Who Among American High School Students."

Teen Leaders Critical of Education - Page Two

The students have more confidence in the presidency than at any other time the question has been asked in "Who's Who" surveys. Some 45% say they have a great deal of confidence in the presidency this year in contrast to 19% in 1980 and 31% in 1975.

Drinking is on the upswing among the high achievers. Fifty-three percent indicate they take an occasional drink, against 37% a year ago and an average of less than a third in 1975.

The poll is conducted among 22,000 high achievers featured in the 1981-82 edition of "Who's Who Among American High School Students," published by Educational Communications, Inc., Northbrook, Ill. The majority (77%) of the respondents are 17-years-old and 80% live in suburban or rural communities.

The young people are recommended for listing by their high school principals or guidance counselors and national youth organizations. Criteria for recognition are leadership and achievement in academics, school activities, community service or athletics and high performance in national scholarship or awards contests.

Better than half the students say teachers in their school are too easy academically and 31% think they grade too high for the quality of work done. If their school's budget were cut, 51% would advocate decreasing the number of administrators to bring it into line.

Nearly nine out of 10 of the high achievers say their own education is good and 61% report they have access to academic programs to meet their needs. Yet, fewer than half (42%) feel

Teen Leaders Critical of Education - Page Three

their school has adequately prepared them for college.

When asked about various social "problems" they are aware of on campus, a good majority noted several. For example, 83% cited pregnancy, more than three-quarters reported student vandalism in school, and 58% knew about drug dealing on campus.

Drugs are a major factor affecting violence in the schools, according to 74% of the top teens. Some 69% say peer pressure contributes and almost two-thirds blame parental apathy. Their solution to school violence? Ninety-two percent say parents should take a more active role in guiding children's behavior. And, 76% think school administrators should adopt a "get-tough" policy and expel troublemakers.

In other survey results, the leading teen-agers favor registration of handguns (80%). At the same time, 75% are convinced that criminals will get guns and use them regardless of the law.

The students have more confidence in the broadcast media (71%) than in the print media (58%) and it may have something to do with the television generation. Nearly a third watch between 16 and 28 hours of television each week.

While more of the "Who's Who" teens may be trying alcohol, they still aren't into drugs. Nine out of 10 have never used drugs and almost the same number say they wouldn't use marijuana even if it were legalized.

Some 73% say they've never participated in sexual intercourse and a fair number (44%) believe premarital sex is not acceptable

Teen Leaders Critical of Education - Page Four

under any circumstances. The majority (55%) do not favor abortion and nearly two-thirds of the young women would not have one if they discovered they were pregnant.

FACT SHEET

"WHO'S WHO AMONG AMERICAN HIGH SCHOOL STUDENTS"

What is "WHO'S WHO AMONG
AMERICAN HIGH SCHOOL
STUDENTS?"

The largest and leading publication
in the field of student recognition.
It was created in 1967 to provide
recognition on a national level for
outstanding junior and senior class
students in public, private and
parochial high schools.

The fifteenth annual "WHO'S WHO AMONG
AMERICAN HIGH SCHOOL STUDENTS,"
published by Educational Communications,
Inc., and printed by Rand McNally,
recognizes 350,000 student high
achievers for their leadership in
academics, extracurricular activities,
community service and athletics.

In addition, "WHO'S WHO" is intended
to serve as a reference work for
institutions and groups interested in
student achievement. It is distributed
to nearly 15,000 libraries, high
schools, colleges and corporations.

Is there any financial
obligation attached to
recognition in "WHO'S WHO?"

There are no charges whatsoever to
students or sponsors contingent upon
this honorary recognition award. The
vast majority of students featured in
"WHO'S WHO" do not purchase the
publication, but do receive the
recognition they have earned. Compli-
mentary copies of "WHO'S WHO" are
available to all participating high
schools, colleges and universities,
public and private libraries.

Page Two -- Fact Sheet
WHO'S WHO AMONG AMERICAN HIGH SCHOOL STUDENTS

Who are these student leaders?

The 350,000 students listed in the fifteenth annual "WHO'S WHO" represent about 5 percent of the 6-1/2 million students who were high school juniors and seniors during the 1980-81 academic year.

They represent 20,000 public, private and parochial high schools in the nation.

Ninety-six percent plan to enter college, and 99 percent have a "B" average or better.

How are the students selected?

Principals and guidance counselors of the 22,000 high schools are asked to recommend outstanding students for "WHO'S WHO." They select junior and senior students who excel in the fields of academics, extracurricular activities, community service or athletics.

Additional students are nominated by youth organizations and by the publishing company for their high performance record in scholarship award contests and activities.

How is biographical information obtained?

Upon their nomination, students are sent a biographical data form. The data supplied by the students, if they meet "WHO'S WHO" criteria, constitutes their listing in the book. A periodic audit is made to assure that the information supplied by students is accurate.

Students are identified in the book by name, high school, city and state. To insure privacy, no home addresses are printed, nor are they released at any time.

Page Three -- Fact Sheet
WHO'S WHO AMONG AMERICAN HIGH SCHOOL STUDENTS

Is there a scholarship program?

Yes. More than \$350,000 has been committed to date by the publishing company's scholarship foundation. The foundation awarded \$50,000 in scholarships during the 1980-81 academic year.

Students competed by submitting test scores from either ACT or SAT examinations. A committee of educators selected winners on the basis of merit.

What is the Grants-In-Aid program?

A Grants-In-Aid program was established in 1975 for the purpose of giving financial assistance to programs and projects designed to encourage student excellence.

To date, more than \$175,000 has been distributed to youth organizations in need of financial assistance to continue programs on behalf of high school students.

What is the Committee on Ethics, Standards and Practices ?

Educational Communications, Inc. brought together noted educators in 1978, for the purpose of establishing guidelines for evaluating Who's Who programs. Standards were developed by the committee, which still serves in an advisory capacity for ECI.

FACT SHEET

1981 ANNUAL SURVEY OF HIGH ACHIEVERS

"WHO'S WHO AMONG AMERICAN HIGH SCHOOL STUDENTS"

What is the "WHO'S WHO"
survey?

The largest independent sampling of
opinions and attitudes of high school
student leaders ever taken.

When was it taken?

During the summer of 1981.

Who participated?

Of the 350,000 student leaders
featured in the 1980-81 edition of
"WHO'S WHO AMONG AMERICAN HIGH SCHOOL
STUDENTS," 50,000 who submitted
biographies by July 1 were sent the
survey form in August. The 22,000
students who returned their ques-
tionnaires by the September deadline
formed the basis for this survey.
All were members of the junior or
senior class during the 1980-81
academic year.

These student leaders were chosen by
principals, guidance counselors and
youth organizations because of their
high achievement in academics, extra-
curricular activities, community
service or athletics; or by the
publishing company because of their
high performance in scholarship or
award contests and activities.

Fact Sheet -- WHO'S WHO Annual Survey - Page Two

Who participated?
(continued)

This is NOT a survey of the average high school student. THESE STUDENTS ARE TOMORROW'S LEADERS.

Why was the survey taken?

"WHO'S WHO AMONG AMERICAN HIGH SCHOOL STUDENTS" believes that in these rapidly changing times it is important to recognize outstanding students and, therefore, encourage achievement. But, more significantly, the company believes that it is vital for the nation to know and understand their opinions and attitudes -- particularly since these achievers are an important segment of the voting population.

This is the twelfth such major survey taken among top students. The company hopes trends can be determined and, in future years, valuable benefits derived.

The publishers regard this effort as an educational experiment. They are in no way attempting to promote or negate any political, moral, or social philosophy; and they are not affiliated with, supported or subsidized by any political or social organization, firm or individual.

Because of its contact with student leaders, it is the publishing company's belief that it is in a position to gather the opinions of top teens and, therefore, has a corporate responsibility to pursue this project.

What general areas does the survey cover?

Attitudes on: education, national politics, foreign policy, women's rights, drugs, sex, alcohol, religion and other contemporary issues.

How were these questions selected?

CHICAGO TRIBUNE education editor, Casey Banas, assisted the publisher in developing questions for the 1981 survey relevant to current concerns in education. The "Who's Who" Committee on Standards, Ethics and Practices also counseled on questions and format.

Originally, the survey questionnaires were developed in day-long seminars with Midwest area honor students. To make the survey more representative of students across the country, questions used through the ninth survey were mailed to a 25-student Advisory Board.

How were the answers tabulated?

By computer, with breakdown for sex, race, geographical region and type of community.

HIGHLIGHTS

TWELFTH ANNUAL SURVEY OF HIGH ACHIEVERS

"WHO'S WHO AMONG AMERICAN HIGH SCHOOL STUDENTS"

Following are brief highlights from the Twelfth Annual Survey of High Achievers, "Who's Who Among American High School Students."

Education

- * 51% of the "Who's Who" students cite teacher and administrator incompetency as a problem in their school.
- * More than half say teachers are too easy academically.
- * 31% indicate teachers grade too high for quality of work done.
- * 88% say their education is good.
- * 42% report their school has prepared them for college.
- * Three-quarters think sex education should be taught in the schools.
- * Almost 53% see students graduate without basic skills.
- * 84% are aware of alcohol abuse on campus.
- * 77% know about student vandalism in their schools.
- * 83% are aware of pregnancy among peers.
- * Nearly three-quarters believe drugs are a factor affecting violence in the schools.
- * 92% say parents should get more involved in guiding children's behavior to quell violence on campus.
- * If school budget cuts were called for, sports would go before electives (22% to 21%).
- * 76% don't feel public funds should be spent on private schools.

Survey Highlights - Page Two

Government

- * 45% of the top teens have a great deal of faith in the presidency.
- * Three-quarters agree with federal spending cuts.
- * 68% would allot their tax dollars to defense spending.
- * Eight out of ten advocate mandatory handgun registration.
- * 75% think criminals will get guns and use them, despite the law.
- * 56% favor mandatory draft registration.
- * 68% favor the use of nuclear power as an energy source.
- * 48% would send military advisors to Third World nations where communists were involved with one faction.
- * 68% would favor military intervention in a conflict in South/Central America if a communist nation were the aggressor.
70% would favor intervention in Europe and 48% in the Middle East.

Private Lives

- * 53% of the teen leaders say they occasionally drink.
- * Nine out of ten have never used drugs.
- * 87% have never smoked cigarettes.
- * 73% have not participated in sexual intercourse.
- * 55% do not favor abortion and two-thirds of the young women would not have one if they were pregnant.
- * 90% believe in traditional marriage.
- * A third think living together outside of marriage is morally wrong.
- * Three-quarters are active members of a religion.
